[Analytics Reports](#) / App Sessions Context

Article

App Sessions Context

Analyze how many people use your app and for how long.

Overview

The data in this report details how frequently people use your application. This report is similar to [App Sessions](#), but includes data for iOS across all distribution methods. Use App Sessions to understand usage of your App Store distributed App, and use App Sessions Context to provide more context to most of the Framework Usage and Performance reports.

- Territories: Worldwide
- Platforms: iOS, iPadOS. For more information about iOS and iPadOS, see the Platforms section in [Data Completeness and Corrections](#).
- Availability:
 - Daily: Every day.
- History: On request, data is available beginning with iOS 17.4 and iPadOS 17.4.
- Completeness: Data from devices that contribute to this report can arrive as late as 8 days after the date it generates on device. You can download recent data daily, but it might be incomplete, and data updates incrementally daily, until all late-arriving events are available.
- Privacy:
 - Includes data from users who have opted to share their data with Apple and developers.
 - Individual rows will only appear if they have a value of 5 or more.

Report Fields

Report Field	Description	Data Type
Count	Number of times the event occurred	integer
Territory	Country or region in which the event occurred	string
Date	Date when the event occurred	string
Platform	OS version on the device on which the event occurred	string
Device	Type of device on which the event occurred	string
Build	Build of device on which event occurred	string
Unique Devices	The count of unique devices	integer
Release Type	Type of software release	string
Duration	How long the app was running	integer
Short Version	The short version of the app string	string
App Version	Version of the app associated with the event	string
