

[SwiftUI](#) / [View](#) / `labelStyle(_:)`

Instance Method

labelStyle(_:)

Sets the style for labels within this view.

iOS 14.0+ | iPadOS 14.0+ | Mac Catalyst 14.0+ | macOS 11.0+ | tvOS 14.0+ | visionOS 1.0+ | watchOS 7.0+

`nonisolated`

```
func labelStyle<S>(_ style: S) -> some View where S : LabelStyle
```

Discussion

Use this modifier to set a specific style for all labels within a view:

```
 VStack {  
     Label("Fire", systemImage: "flame.fill")  
     Label("Lightning", systemImage: "bolt.fill")  
 }  
.labelStyle(MyCustomLabelStyle())
```

See Also

Displaying text

`struct Text`

A view that displays one or more lines of read-only text.

`struct Label`

A standard label for user interface items, consisting of an icon with a title.
