[Swift / Calling APIs Across Language Boundaries](#)

Sample Code

Calling APIs Across Language Boundaries

Use a variety of C++ APIs in Swift – and vice-versa – across multiple targets and frameworks in an Xcode project.

[Download](#)

macOS 14.0+ | Xcode 15.0+

Overview

Note

This sample code project is associated with WWDC 2023 sessions 10172: [Mix Swift and C++](#) and 10268: [Meet mergeable libraries](#).

Configure the sample code project

Before you run the sample code project in Xcode, ensure you're using macOS 14.0 or later.
