

[App Intents](#) / IntentChoiceOption

Structure

IntentChoiceOption

A structure representing an entry in a list of options for a person to choose from before an app intent resumes its action.

iOS 26.0+ | iPadOS 26.0+ | Mac Catalyst | macOS 26.0+ | tvOS 26.0+ | visionOS 26.0+ | watchOS 26.0+

```
struct IntentChoiceOption
```

Overview

Each option includes display text and an optional style that influences its visual presentation. For example, an option for deleting a file might use a text and style to communicate its destructive action.

Topics

Structures

```
struct Style
```

Defines the visual style and semantic meaning of an [IntentChoiceOption](#).

Initializers

```
init(title: LocalizedStringResource, style: IntentChoiceOption.Style)
```

Creates a new option for a person to choose to continue an app intent.

Instance Properties

`let style: IntentChoiceOption.Style`

The style applied to the option, affecting its visual appearance in the system UI.

`let title: LocalizedStringResource`

The localized text displayed for this option.

Type Properties

`static var cancel: IntentChoiceOption`

A system-provided option that cancel the app intent.
