

[Translation](#) /  / [TranslationSession.Request](#) / `clientIdentifier`

## Instance Property

# clientIdentifier

An optional unique identifier to associate a translation request with its response.

iOS 18.0+ | iPadOS 18.0+ | Mac Catalyst 26.0+ | macOS 15.0+

```
var clientIdentifier: String?
```

## Discussion

When you set this identifier, it returns the same value in the corresponding [TranslationSession.Response](#).
