Discussion

Allowed values based on sales report type

Each sales report type has specific valid values for `reportType`, `reportSubType`, `frequency`, and `version`. If you use other types, it results in an error. For more details on each report type, see [Download and view reports](#).

Note

Version 1_2 of the Subscription, Subscription Event, and Subscriber reports in Sales and Trends is no longer available for download.

reportType	reportSubType	frequency	version
