

[SwiftUI](#) / [WindowStyle](#) / titleBar

Type Property

titleBar

A window style which displays the title bar section of the window.

macOS 11.0+

```
static var titleBar: TitleBarWindowState { get }
```

Available when `Self` is `TitleBarWindowState`.

See Also

Getting built-in window styles

```
static var automatic: DefaultWindowState
```

The default window style.

```
static var hiddenTitleBar: HiddenTitleBarWindowState
```

A window style which hides both the window's title and the backing of the titlebar area, allowing more of the window's content to show.

```
static var plain: PlainWindowState
```

The plain window style.

```
static var volumetric: VolumetricWindowState
```

A window style that creates a 3D volumetric window.
