

[Foundation](#) / [NSUserActivity](#) / `isEligibleForPrediction`

## Instance Property

# isEligibleForPrediction

A Boolean value that determines whether Siri can suggest the user activity as a shortcut to the user.

iOS 12.0+ | iPadOS 12.0+ | Mac Catalyst 13.1+ | visionOS 1.0+ | watchOS 5.0+

```
var isEligibleForPrediction: Bool { get set }
```

## Discussion

To donate a user activity to Siri Shortcuts, set `isEligibleForPrediction` to `true` and make the user activity current. To make the user activity current, call the activity's `becomeCurrent()` method, or assign it to the `userActivity` property on a `UIViewController` or `UIResponder` object. For more information, see [Donating Shortcuts](#).
