

[Game Controller](#) / `GCStylusDidDisconnectNotification`

Global Variable

# GCStylusDidDisconnectNotification

A notification that posts after a stylus accessory disconnects from the device.

visionOS 26.0+

```
extern NSString * const GCStylusDidDisconnectNotification;
```

## Mentioned in

 Discovering and tracking spatial game controllers and styli

## Discussion

Use this constant with `NSNotificationCenter` to listen for stylus disconnection events.

The `object` property of the notification will contain the `GCStylus` that was disconnected.

## See Also

### Accessing the styli

```
class var styli: [GCStylus]
```

Get the collection of stylus accessories currently connected to the device.

`GCStylusDidConnectNotification`

A notification that posts after a stylus accessory connects to the device.
