[Advanced Commerce API](#) / Change Subscription Metadata

Web Service Endpoint

Change Subscription Metadata

Update the SKU, display name, and description associated with a subscription, without affecting the subscription's billing or its service.

Advanced Commerce API 1.0+

URL

POST `https://api.storekit.itunes.apple.com/advancedCommerce/v1/subscription/changeMetadata`

Sandbox URL

POST `https://api.storekit-sandbox.itunes.apple.com/advancedCommerce/v1/subscription/changeMetadata`

Path Parameters

transactionId string	(Required) The transaction identifier of the auto-renewable subscription to get changes to its metadata. Use the subscription's original transaction ID or any subsequent transaction ID of a transaction related to the subscription.
--------------------------------	---

HTTP Body

SubscriptionChange	The request body that contains the metadata changes.
MetadataRequest	Content-Type: application/json

Response Codes

200 OK

<code>SubscriptionChange</code>	Request succeeded.

Discussion

Use this endpoint to update the display name and description of an auto-renewable subscription. Calling this endpoint doesn't change the price, billing details, or the service. For example, you can call `Change Subscription Metadata` if a subscription's display name changes due to a change in its branding.

Don't call this endpoint if a customer is changing subscriptions to receive a different service, such as upgrading, downgrading, or cross-grading. For such changes, use [`SubscriptionModifyInAppRequest`](#).

See Also

Subscription metadata changes from the server

object `SubscriptionChangeMetadataRequest`

The request body you provide to change the metadata of a subscription.

object `SubscriptionChangeMetadataResponse`

The response body for a successful subscription metadata change.

object `SubscriptionChangeMetadataDescriptors`

The subscription metadata to change, specifically the description and display name.

object `SubscriptionChangeMetadataItem`

The metadata to change for an item, specifically its SKU, description, and display name.
