Article

MapKitJS updates

Learn about important changes to MapKitJS.

Overview

Browse notable changes in MapKit JS.

June 2025

- Render Look Around views and Look Around previews that allow someone to see a street-level view of a place by using doc://com.apple.documentation/documentation/mapkitjs/mapkit.lookaround and doc://com.apple.documentation/documentation/mapkitjs/mapkit.lookaroundpreview.

- Request cycling directions and ETAs using the `Cycling` transport type.

June 2024

- Obtain a place identifier to track a specific location, such as a business, park, physical feature, or landmark, over its lifetime.

- Show detailed information about a point of interest across MapKit, MapKit for SwiftUI, and MapKit JS.

- Filter location results using criteria such as neighborhoods, postal codes, and municipalities.

- Use pagination to obtain significantly more results over a successive set of calls when using the Apple Maps Server API.
