Network / NWParametersBuilder

Structure

# NWParametersBuilder

An opaque class that is responsible for creating and configuring NWParameters based on the parameterized protocol stack.

iOS 26.0+  |  iPadOS 26.0+  |  Mac Catalyst 26.0+  |  macOS 26.0+  |  tvOS 26.0+  |  visionOS 26.0+  |  watchOS 26.0+

```swift
struct NWParametersBuilder<Top, each P> where Top : NetworkProtocol
Options, repeat each P : NetworkProtocolOptions
```

# Topics

## Initializers

init(() -> (Top, repeat each P))

init(auto: () -> (Top, repeat each P))

## Instance Methods

func wifiAware((inout WAParameters) -> Void) -> NWParametersBuilder<Top
, repeat each P>

  Configure Wi-Fi Aware properties on an `NetworkConnection`

## Type Methods

static func parameters(() -> (Top, repeat each P)) -> NWParameters
Builder<Top, repeat each P>

```
static func parameters(initialParameters: NWParameters, () -> (Top,
repeat each P)) -> NWParametersBuilder<Top, repeat each P>
```

# Relationships

## Conforms To

NWParametersProvider
