Structure

MobileNationalIDCardDisplayRequest

A mobile national ID card request that retrieves elements from the holder and displays the results onscreen for visual inspection.

iOS 18.0+ | iPadOS 18.0+ | Mac Catalyst 18.0+ | visionOS 2.0+

```
struct MobileNationalIDCardDisplayRequest
```

Topics

Creating a display request

```
init(region: Locale.Region, elements: [MobileNationalIDCardDisplay
Request.Element], options: MobileNationalIDCardDisplayRequest.Options)
```
   Creates a new mobile national ID card display request.

Determining the region availability

```
static func isSupportedRegion(Locale.Region) -> Bool
```
   Returns a Boolean value that indicates whether you can make a request for the specified region.

Configuring the request details

```
var region: Locale.Region
```
   The region of the document you're requesting.

var elements: [MobileNationalIDCardDisplayRequest.Element]

The document elements you're requesting.

struct Element

A type that represents an element you can request from a mobile national ID card.

var options: MobileNationalIDCardDisplayRequest.Options

An object that customizes how to perform a display request.

struct Options

An object that customizes how to perform a display request.

Handling the response

struct Response

A type that contains the response information from a successful mobile national ID card display request.
