Function

simd_distance

Returns the distance between two vectors.

```
static _Float16 simd_distance(simd_half16 __x, simd_half16 __y);
```

See Also

Length and distance functions

simd_length

　　Returns the length of a vector.

simd_fast_length

　　Returns the fast length of a vector.

simd_precise_length

　　Returns the precise length of a vector.

simd_length_squared

　　Returns the square of the length of a vector.

simd_fast_distance

　　Returns the fast distance between two vectors.

simd_precise_distance

　　Returns the precise distance between two vectors.

simd_distance_squared

Returns the square of the distance between two vectors.
