API Collection

Color

Represent colors using built-in or custom formats, and give users options for selecting and applying colors.

Overview

For design guidance, see Human Interface Guidelines.

Topics

Colors

`class` `NSColor`

   An object that stores color data and sometimes opacity (alpha value).

`class` `NSColorList`

   An ordered list of color objects, identified by keys.

`class` `NSColorSpace`

   An object that represents a custom color space.

Color Selection

`class` `NSColorPicker`

   An abstract superclass that implements the default color picking protocol.

```
class NSColorWell
```
A control that displays a color value and lets the user change that color value.

```
class NSColorPickerTouchBarItem
```
A bar item that provides a system-defined color picker.

Color Sampler

```
class NSColorSampler
```
An object that displays the system's color-sampling interface and returns the selected color to your app.
