StoreKit / SKStoreReviewController `Deprecated`

Class

SKStoreReviewController Deprecated

An object that controls the process of requesting App Store ratings and reviews from customers.

iOS 10.3–18.0 `Deprecated` | iPadOS 10.3–18.0 `Deprecated` | Mac Catalyst 13.1–18.0 `Deprecated` | macOS 10.14–15.0 `Deprecated` | visionOS 1.0–2.0 `Deprecated`

```
class SKStoreReviewController
```

> **Deprecated**
>
> Use RequestReviewAction instead.

Overview

Use the `requestReview(in:)` method to indicate when it makes sense within the logic of your app to ask the customer for ratings and reviews.

Topics

Indicating an appropriate time for a review

~~class func requestReview(in: UIWindowScene)~~

Tells StoreKit to ask the customer to rate or review the app, if appropriate, using the specified scene.

```
class func requestReview()
```

Tells StoreKit to ask the customer to rate or review your app, if appropriate.
