Structure

AppIntentError

Errors that your intent-handling code can return to indicate problems while interpreting or executing an app intent.

iOS 16.0+ | iPadOS 16.0+ | Mac Catalyst | macOS 13.0+ | tvOS 16.0+ | visionOS | watchOS 9.0+

```
struct AppIntentError
```

Topics

Getting the error codes

```
static var restartPerform: AppIntentError
```

Enumerations

enum `PermissionRequired`

Errors that indicate the app doesn't have the required permission to perform an action.

enum `Unrecoverable`

Unknown or unrecoverable errors that might have occurred due to either a system or user error.

enum `UserActionRequired`

Errors that represent a state where a person needs to respond to successfully complete the action.
