Structure

WAPath

A representation of the current Wi-Fi Aware path.

iOS 26.0+ | iPadOS 26.0+

```
struct WAPath
```

Topics

Getting a connection endpoint

`let endpoint: WAEndpoint`

The Wi-Fi Aware endpoint that's connected.

Getting a current performance

`let performance: WAPerformanceReport`

The current performance metrics for the Wi-Fi Aware data path.

Getting path metrics

`let durationActive: Duration`

A property that indicates a cumulative duration data path is connected on this Wi-Fi Aware path.

Relationships

Conforms To

`Sendable`, `SendableMetatype`

See Also

Connection performance

`struct NWPath`

An object that contains information about the properties of the network that a connection uses, or that are available to your app.

`enum WAPerformanceMode`

The performance mode that indicates what performance criterion to prioritize.

`enum WAAccessCategory`

The underling quality-of-service (QoS) the Wi-Fi layer uses to transmit data packets from a connection over the air.

`struct WAPerformanceReport`

The current performance state of the data path.
