Analytics Reports / App Crashes

Article

App Crashes

Review crashes for your App Store apps based on app version and device type.

Overview

Use this report to understand crashes for your App Store apps by app version and device type.

- Territories: Worldwide

- Platforms: iOS, iPadOS, macOS, tvOS, visionOS

- Availability:

  - Daily: Every day

  - Weekly: Every Friday for the previous week (Monday to Sunday).

  - Monthly: On the fifth day of the following month.

- Completeness: Within five days. Weekly and monthly reports are complete by default.

- History: On request, data is available beginning from January 1, 2024.

- Privacy:

  - Includes app crashes data from users who have opted to share their data with Apple and developers. Data is provided only when events exist from at least five users for the respective report.

The Analytics Reports framework delivers new portions of report content as instances. Each instance can contain one or more batches of data, to accommodate late-arriving events, or in rare cases, data corrections. To learn more, see Data Completeness and Corrections.

Report Fields

Report Field	Description	Data Type
Date	Date on which the event occurred. For weekly and monthly instances, this column represents the first day of the week and month, respectively.	`date`
App Name	The name of the app provided by you during app setup in App Store Connect.	`string`
App Apple Identifier	Your app's Apple ID.	`integer`
App Version	The version of the app associated with the crash.	`string`
Device	The device on which the event occurred.	`string`
Platform Version	The OS version of the device on which the event occurred.	`string`
Crashes	The total number of crashes.	`integer`
Unique Devices	Number of unique devices where app crashed	`integer`
