Type Method

screenPoint(fromView:point:)

Returns the point in screen coordinates.

macOS 10.10+

```swift
static func screenPoint(
    fromView parentView: NSView,
    point: NSPoint
) -> NSPoint
```

Discussion

Given a point in the specified view's coordinates, it returns the same point in the screen's coordinates.

Getting Screen Coordinates

```swift
static func screenRect(fromView: NSView, rect: NSRect) -> NSRect
```
    Returns the frame in screen coordinates.
