Class

ABPersonView

An object that provides a view for displaying and editing contacts.

macOS 10.7+

```
@MainActor
class ABPersonView
```

Overview

> **Note**
>
> You should not override the `fieldEditor(_:for:)` method of the window that contains this view.

Topics

Working with Person Views

`var editing: Bool`

A Boolean value that indicates whether the person view is in editing mode.

`var person: ABPerson!`

The contact record being displayed.

var shouldShowLinkedPeople: Bool

Indicates whether the person view should display data from person records that are linked with the person record being displayed.
