Type Method

disambiguation(with:)

Creates an object whose resolution requires the user to select from among the specified objects.

iOS 10.0+ | iPadOS 10.0+ | Mac Catalyst 13.1+ | macOS 11.0+ | visionOS 1.0+ | watchOS 3.2+

```swift
class func disambiguation(with peopleToDisambiguate: [INPerson]) -> Self
```

Parameters

peopleToDisambiguate
An array of INPerson objects for the user to choose from.

Return Value

A new INPersonResolutionResult object.

Mentioned in

☐ Improving interactions between Siri and your messaging app

Discussion

Use this method to create a result object when more than one person might match the given information and you can't pick one definitively. Ask the user to select from among the people you specify.

See Also

Creating a Resolution Result Object

```
class func success(with: INPerson) -> Self
```
Creates an object whose resolution involves the successful matching of the specified parameter.

```
class func confirmationRequired(with: INPerson?) -> Self
```
Creates an object whose resolution requires that the user must confirm the value before proceeding.
