Object

CiPullRequestStartCondition

Settings for a start condition that starts a build if a pull request changes.

App Store Connect API 1.5+

```
object CiPullRequestStartCondition
```

Properties

destination `CiBranchPatterns`	The destination branch name and custom patterns you configure for a workflow that starts a new build for changes to a pull request.
filesAndFoldersRule `CiFilesAndFoldersRule`	The custom rule that determines whether Xcode Cloud starts a build or not based on a pull request's changes to files.
source `CiBranchPatterns`	The source branch name and custom patterns you configure for a workflow that starts a new build for changes to a pull request.
autoCancel `boolean`	A Boolean value that indicates whether Xcode Cloud automatically cancels or skips builds.
