Enumeration

WACapabilities.Feature

Features that your app's current host device can support.

iOS 26.0+ | iPadOS 26.0+

```
enum Feature
```

Overview

Supported features are typically created by the system on behalf of the client, so they usually don't need to be instantiated directly.

Topics

Checking for Wi-Fi Aware support

```
case wifiAware
```
   Indicates that the host supports Wi-Fi Aware.
