Foundation / NSExtensionItem / attributedContentText

Instance Property

# attributedContentText

An optional string describing the extension item content.

iOS 8.0+ | iPadOS 8.0+ | Mac Catalyst 13.1+ | macOS 10.10+ | tvOS 9.0+ | visionOS 1.0+ | watchOS 2.0+

```
@NSCopying
var attributedContentText: NSAttributedString? { get set }
```

# Discussion

> **Important**
>
> Alternatively, you can set attributed content in the <u>userInfo</u> dictionary using the <u>NSExtensionItemAttributedContentTextKey</u> key. However, setting the <u>userInfo</u> dictionary after setting <u>attributedContentText</u> overrides this property.

# See Also

## Item Contents

var attachments: [NSItemProvider]?

   An optional array of media data associated with the extension item.
