Class

NSUserNotificationAction Deprecated

An action that the user can take in response to receiving a notification.

macOS 10.10–11.0 Deprecated

```
class NSUserNotificationAction
```

> **Deprecated**
>
> Use the User Notifications framework instead.

Overview

User notifications can specify one or more actions to show to the user by using the `additionalActivationAction` or `additionalActions` properties. `NSUserNotificationAction` objects contain the localized title shown to the user and an identifier used to differentiate between presented actions.

Topics

Creating User Notification Actions

~~convenience init(identifier: String?, title: String?)~~

Creates a user notification action with a specified identifier and title.

Getting the Identifier and Title

~~var identifier: String?~~

The identifier for the user notification action.

~~var title: String?~~

The localized title shown to the user.
