Article

MapKit updates

Learn about important changes to MapKit.

Overview

Browse notable changes in MapKit.

June 2025

- Find information about a place using `MKGeocodingRequest` and `MKReverseGeocodingRequest`.

- Get address information to use in displays, such as place cards and annotations you create using an MKMapItem, by using `MKAddress` with Search and reverse geocoding.

- Obtain formatted address strings for a place's full address, city, or region using `MKAddressRepresentations`.

- Request cycling directions and ETAs using the `cycling` transport type.

June 2024

- Obtain a place identifier to track a specific location, such as a business, park, physical feature, or landmark, over its lifetime.

- Show detailed information about a point of interest across MapKit, MapKit for SwiftUI, and MapKit JS.

- Filter location results using criteria such as neighborhoods, postal codes, and municipalities.

- Use pagination to obtain significantly more results over a successive set of calls when using the Apple Maps Server API.
