Sample Code

Visualizing HealthKit State of Mind in visionOS

Incorporate HealthKit State of Mind into your app and visualize the data in visionOS.

[Download]

iOS 18.1+ | iPadOS 18.1+ | visionOS 2.1+ | Xcode 16.1+

Overview

> **Note**
>
> This sample code project is associated with WWDC24 session 10083: Get started with HealthKit in visionOS and session 10109: Explore wellbeing APIs in HealthKit.

Configure the sample code project

Before you run the sample code project:

1. Open the sample with the latest version of Xcode.

2. Set the developer team for the project target to let Xcode automatically manage the provisioning profile. For more information, see Assign a project to a team.

See Also

Health data

Saving data to HealthKit

Create and share HealthKit samples.

Reading data from HealthKit

Use queries to request sample data from HealthKit.

`class HKHealthStore`

The access point for all data managed by HealthKit.

Creating a Mobility Health App

Create a health app that allows a clinical care team to send and receive mobility data.

Data types

Specify the kind of data used in HealthKit.

Samples

Create and save health and fitness samples.

Queries

Query health and fitness data.

Logging symptoms associated with a medication

Fetch medications and dose events from the HealthKit store, and create symptom samples to associate with them.
