API Collection

AXValue.h

This header contains functions and data types for working with AXValueType wrappers.

Overview

See the Overview section above for header-level documentation.

Overview

Included Headers

- <AvailabilityMacros.h>

- <CoreServices/CoreServices.h>

- <CoreFoundation/CoreFoundation.h>

Topics

Miscellaneous

```
func AXValueCreate(AXValueType, UnsafeRawPointer) -> AXValue?

func AXValueGetType(AXValue) -> AXValueType

func AXValueGetTypeID() -> CFTypeID
```

```
func AXValueGetValue(AXValue, AXValueType, UnsafeMutableRawPointer) ->
Bool
```

Data Types

See the Overview section above for header-level documentation.

```
class AXValue
```

```
enum AXValueType
```

```
func AXValueGetValue(AXValue, AXValueType, UnsafeMutableRawPointer) ->
Bool
```
