Metal / MTLDevice / makeArgumentTable(descriptor:)

Instance Method

makeArgumentTable(descriptor:)

Creates a new argument table from an argument table descriptor.

iOS 26.0+ | iPadOS 26.0+ | Mac Catalyst 26.0+ | macOS 26.0+ | tvOS 26.0+ | visionOS 26.0+

```
func makeArgumentTable(descriptor: MTL4ArgumentTable
Descriptor) throws -> any MTL4ArgumentTable
```

Required

Parameters

`descriptor`
    A <u>MTL4ArgumentTableDescriptor</u> instance that configures the <u>MTL4ArgumentTable</u> instance.

Return Value

A <u>MTL4ArgumentTable</u> instance, or `nil` if the function failed.
