AVFoundation / AVPartialAsyncProperty / naturalTimeScale

Type Property

naturalTimeScale

The natural time scale of the media that a track references.

iOS 15.0+ | iPadOS 15.0+ | Mac Catalyst | macOS 12.0+ | tvOS 15.0+ | visionOS 1.0+ | watchOS 8.0+

```swift
static var naturalTimeScale: AVAsyncProperty<Root, CMTimeScale> { get }
```

Available when `Root` inherits `AVAssetTrack`.

Discussion

Use the load(_:isolation:) method to retrieve the property value.

See Also

Loading temporal information

static var timeRange: AVAsyncProperty<Root, CMTimeRange>

The time range of the track within the overall timeline of the asset.

static var estimatedDataRate: AVAsyncProperty<Root, Float>

The estimated data rate, in bits per second, of the media that the track references.
