Sample Code

Implementing Background Push Notifications

Add background notifications to your app by using the UserNotifications framework.

Download

iOS 13.0+ | iPadOS 13.0+ | Xcode 11.5+

Overview

> **Note**
>
> This sample code project is associated with WWDC20 session 10095: Push Notifications Primer.

Configure the Sample Code Project

Before you run the sample code project in Xcode, set up a remote notification server to send pushes. See Setting Up a Remote Notification Server.
