Type Method

success(with:)

Creates an object whose resolution involves the successful matching of the specified parameter.

iOS 10.0+ | iPadOS 10.0+ | Mac Catalyst 13.1+ | macOS 11.0+ | visionOS 1.0+ | watchOS 3.2+

```swift
class func success(with resolvedPerson: INPerson) -> Self
```

Parameters

`resolvedPerson`

The object that resolves the requested parameter of the intent. This value may be different than the one specified in the intent object.

Return Value

A new `INPersonResolutionResult` object.

Mentioned in

☐ Improving interactions between Siri and your messaging app

Discussion

Use this method to create a result object when you recognize the specified user and can resolve that person to your app's internal data structures.
