A message that tells a person why the app is requesting access to track accessory position and location.

visionOS 26.0+

# Details

### Name

Privacy - Accessory Tracking Usage Description

### Type

String

# Discussion

Use this key to indicate that your app requires access to accessory-tracking data. The first time your app tries to access accessory-tracking data, the system prompts for permission. Provide a string for the prompt that explains why your app needs access.
