DockKit updates

Learn about important changes to DockKit.

Overview

Browse notable changes in DockKit.

June 2024

- Use `accessoryEvents` to acquire button events, including special ones such as shutter, flip and zoom, and custom events, along with their identifier and pressed state.

- Obtain a summary of each tracked subject. A summary consists of an identifier, face bounding box, saliency rank, speaking confidence, and looking at camera confidence.

- Pass an array of identifiers to select multiple subjects.

- Obtain information about the battery of a DockKit accessory, including battery name, battery percentage, and charging state.
