Class

ACAccountCredential Deprecated

A credential object that encapsulates the information needed to authenticate a user.

iOS 6.0–15.0 `Deprecated` | iPadOS 6.0–15.0 `Deprecated` | Mac Catalyst 13.1–15.0 `Deprecated` | macOS 10.8–12.0 `Deprecated`

```
class ACAccountCredential
```

> **Deprecated**
>
> Use appropriate non-Apple SDK corresponding to the type of account you want to reference instead

---

Overview

To create an account credential that uses the OAuth open authentication standard, use the `init(oAuthToken:tokenSecret:)` method.

Topics

Initializing Credentials

~~init!(oAuthToken: String!, tokenSecret: String!)~~

Initializes an account credential using OAuth.

~~init!(oAuth2Token: String!, refreshToken: String!, expiryDate: Date!)~~

Initializes an account credential using OAuth 2.

Accessing Credential Properties

~~var oauthToken: String!~~

The token used for the credential.
