Type Property

vibrant

The system desaturates the widget, making a monochrome version that it uses to create an adaptive, vibrant effect.

iOS 16.0+ | iPadOS 16.0+ | Mac Catalyst | macOS 13.0+ | visionOS 26.0+ | watchOS 9.0+

```
static let vibrant: WidgetRenderingMode
```

Discussion

The system displays vibrant widgets on the Lock Screen on iPhone.

See Also

Rendering modes

```
static let fullColor: WidgetRenderingMode
```
    The system renders the widget in full color.

```
static let accented: WidgetRenderingMode
```

The system divides the widget's view hierarchy into an accent group and a default group, applying a different color to each group.
