Type Alias

WAPairedDevice.Devices

A dictionary holding a snapshot of currently paired devices accessible and known to your app.

iOS 26.0+ | iPadOS 26.0+

```
typealias Devices = [WAPairedDevice.ID : WAPairedDevice]
```

Mentioned in

📄 Connecting devices for peer-to-peer Wi-Fi

Discussion

An empty dictionary indicates that no paired devices are known to your app.
