SwiftUI / EquatableView

Structure

EquatableView

A view type that compares itself against its previous value and prevents its child updating if its new value is the same as its old value.

iOS 13.0+ | iPadOS 13.0+ | Mac Catalyst 13.0+ | macOS 10.15+ | tvOS 13.0+ | visionOS 1.0+ | watchOS 6.0+

```
@frozen
struct EquatableView<Content> where Content : Equatable, Content : View
```

Topics

Creating an equatable view

`init(content: Content)`

`var content: Content`

Relationships

Conforms To

`View`
