Framework

Audio Unit Deprecated

Add sophisticated audio manipulation and processing capabilities to your app.

iOS 2.0+ | iPadOS 2.0+ | Mac Catalyst 13.0+ | macOS 10.0+ | tvOS 9.0+ | visionOS 1.0+

> **Deprecated**
>
> Use the Audio Unit types in Audio Toolbox instead.

Overview

The Audio Unit framework provides interfaces for hosting either version 2 or version 3 audio units and implementing version 3 audio processing plug-ins known as Audio Unit extensions. Developers implementing version 3 audio units should subclass the `AUAudioUnit` class.

Version 3 Audio Unit extensions can be used on iOS, tvOS, and macOS by host apps and distributed via the App Store.
