Property List Key

WiFiAwareServices

Dictionaries of Wi-Fi Aware services that the app can publish or subscribe to.

iOS 26.0+ | iPadOS 26.0+

Details

Name
Wi-Fi Aware Services

Type
Object

Overview

This key works with the Wi-Fi Aware framework, to define the services your app publishes, or to specify the services your app subscribes to, or both.

The system requires your app to have the `com.apple.developer.wifi-aware` entitlement, configured according to services you specify in this key to interact with the specified services at runtime.

For information on defining the services, see Adopting Wi-Fi Aware.
