Properties

albumType string	The type of the album. The possible values are `standard`, `single`, `deluxe`, `compilation`, and `ep`.
artistRoles [`Album.ArtistRole`]	**(Required)** A list of artists and their roles.
artworks `Album.Artworks`	**(Required)** A mapping of locale to localized album cover art.
contentProvider string	The name of the company that provides the album. Don't use this name for display purposes. This name doesn't display in Apple Music.
contentTraits [`string`]	**(Required)** A list of the content traits for the album. The possible values are `remix`, `live`, `compilation`, and `karaoke`.
copyright string	The copyright notice text.
copyrightPline string	The copyright performance rights text that displays in Apple Music.
featuredArtists	**(Required)** A list of featured artists for the album.

[Album.Related Artist]	
genres [Album.Genre]	(Required) A list of genre information for the album.
id string	The identifier for the album in Apple Music.
lastModifiedTime string	The time, in ISO 8601 format, of the entity's most recent update.
name Album.Name	(Required) A mapping of locale to localized uncensored names for the album.
nameDefault string	The default name for the album.
namePronunciation Album.Name Pronunciation	(Required) A mapping of locale to translations for the specific pronunciation-name translation type.
parentalAdvisoryType string	The type of parental advisory status. The possible values are `none`, `explicit`, `not explicit`, and `cleaned`.
prices Album.Prices	(Required) A mapping of locale to pricing information. Pricing offer parameters include `price`, `priceType`, and `quality`.
primaryArtists [Album.Related Artist]	(Required) A list of the primary artists of the album.
recordLabels [Album.RecordLabel]	(Required) A list of record labels for the album.
releaseDate Album.ReleaseDate	(Required) A mapping of locale to release date, in YYYY-MM-DD format.
songs [Album.RelatedSong]	(Required) A list of songs in the album.
titleVersion Album.TitleVersion	(Required) A mapping of locale to translations for the specific title-version translation type.

titleVersion Pronunciation Album.TitleVersion Pronunciation	**(Required)** A mapping of locale to translations for the specific title-version-pronunciation-name translation type.
upc string	The Universal Product Code or European Article Number for a piece of content from the provider.
urlTemplate string	A template for the URL to view the entity in Apple Music. The template requires an ISO country code for the `{country-code}` placeholder.
