Enumeration

EnergyKitError

A specialized error that provides localized messages describing the error and why it occurred.

iOS 26.0+ | iPadOS 26.0+ | Mac Catalyst | macOS 26.0+

```
enum EnergyKitError
```

Topics

Viewing error reasons

`case guidanceUnavailable`

An error that indicates the framework fails to provide guidance for a location.

`case inProgress`

An error that indicates a request is already in progress.

`case invalidLoadEvent`

An error that indicates an invalid load event.

`case permissionDenied`

An error that indicates the client doesn't have permission to access a requested API.

`case serviceUnavailable`

An error that indicates when a requested service fails to start.

`case venueUnavailable`

An error that indicates a referenced venue is invalid, nonexistent, or restricted by the person.

case locationServicesDenied

An error that indicates that Location Services is off in the home's settings.

case rateLimitExceeded

An error that indicates the app exceeds the rate limit for using the framework.

case unsupportedRegion

An error that indicates the device resides in an unsupported region.

Reading error messages

var errorDescription: String?

A localized message describing what error occurred.

var failureReason: String?

A localized message providing text if the person requests help.

var helpAnchor: String?

A localized message providing text if the user requests help

var recoverySuggestion: String?

A localized message describing how to recover from the failure.
