ErrorResponse   Internal server error.
Content-Type: application/json

Discussion

When you call this endpoint, Apple Pay server unlinks — invalidates — the merchant token, and the token is no longer valid for future transaction authorizations. Call this endpoint in the following cases:

- Someone cancels a recurring transaction on your website or in your app that uses this merchant token

- Someone changes the payment method for a recurring transactions, for example, they stop using Apple Pay for the transaction
