Structure

FileEntityIdentifier

An identifier for an app entity that refers to a document or other file.

iOS 18.0+ | iPadOS 18.0+ | Mac Catalyst | macOS 15.0+ | tvOS 18.0+ | visionOS 2.0+ | watchOS 11.0+

```
struct FileEntityIdentifier
```

Topics

Instance Properties

`var draftIdentifier: String?`

The document draft identifier, if the document hasn't been materialized on disk yet.

`var fileURL: URL?`

A URL that locates a file saved to disk.

`var isDraft: Bool`

Indicates whether this identifier represents a document draft.

Type Methods

`static func draft(identifier: String) -> FileEntityIdentifier`

Creates and returns an identifier for a draft document.

`static func file(url: URL) throws -> FileEntityIdentifier`

Creates and returns an identifier with the provided URL to the file on disk.
