Assignables / AssignableDocumentView

Structure

AssignableDocumentView

SwiftUI View to display an `AssignableDocument`.

iOS 17.4+ | iPadOS 17.4+ | Mac Catalyst 17.4+ | visionOS

```
@MainActor @preconcurrency
struct AssignableDocumentView
```

Topics

Creating a document view

init(document: Binding<AssignableDocumentView.Document>, activePartID: MergeablePartsContainerPartID?, hiddenPartIDs: [MergeablePartsContainer PartID], selectedPageID: Binding<AssignableDocumentView.Document.Page. ID?>?, selectedQuestionID: Binding<AssignableDocumentView.Document. Question.ID?>?, showsPageThumbnails: Bool, isStructureEditingEnabled: Bool)

Displays an `AssignableDocument`.

Customizing the view

typealias Document

The document type that this view presents.

Initializers

```
init(document: Binding<AssignableDocumentView.Document>, activePartID:
MergeablePartsContainerPartID?, hiddenPartIDs: [MergeablePartsContainer
PartID], selectedPageID: Binding<AssignableDocumentView.Document.Page.
ID?>?, selectedQuestionID: Binding<AssignableDocumentView.Document.
Question.ID?>?, showsPageThumbnails: Bool, isStructureEditingEnabled:
Bool, allowsPencilDrawing: Bool, onMarkupActivation: (Bool) -> Void)
```
   Displays an `AssignableDocument`.

Relationships

Conforms To

`Sendable, SendableMetatype, View`
